ESTATE HEATROLA

is the new-day way of heating for small homes—with or **WITHOUT BASEMENTS**. Installed in one of the living rooms, it supplies moist warm air to all connecting rooms—upstairs and down.

Results are amazing. The owner (or renter) of a small home is now offered all the advantages of warm-air heating at low cost.

Estate Heatrola burns any kind of coal—hard or soft, lignite or slack. Wood also can be used with highly satisfactory results.

The beautiful mahogany finish of the Heatrola is a vitreous enamel—hard and smooth as glass, and practically everlasting. It is grained to look like rare old mahogany. You can rub it and dust it with a cloth, just as you do your furniture. No castiron parts to black; no nickel to polish.

IT HAS A WONDERFUL RECORD!

Made by the Estate Stove Co., Hamilton, Ohio

THE HOFFMAN DIRECTORIES

HOME OFFICE: QUINCY, ILL.

156325

INTRODUCTORY

IN PRESENTING this volume of the City Directory, it is but fitting that we should offer some remarks regarding the same. The contents of this work are the results of several months labor by experts in name taking, using every precaution and search to get names, correct addresses, etc.

A complete directory is never the result of a single canvass, and is obtained only by a liberal expenditure of both time and money, utilizing the information obtained through previous issues and a continual collection of data. Directory publishing is a vocation peculiar to itself, and is carried on properly only by those experienced in and thoroughly conversant with its many details.

Allow us to make the following suggestions: First, as to the similarity of names which, in sound, are the same, but often spelled very differently. For illustration, the name Read is spelled Read, Reid, Reed, Reade, Reide, etc. In looking for names, use judgment in the search and ascertain whether it may not be spelled differently from your idea of it and go through the list making sure if the name you are looking for is given. We have known people looking for "Smith" throw down the book in disgust when, on investigation, the name sought for proved to be Smythe.

In conclusion, we wish to thank our many patrons for the generous support they have given us, and trust that the result of our efforts will meet with their approval and appreciation. We have used every precaution to issue a valuable and accurate work. While errors may be found, such, however, are unavoidable in a work of this kind.

Madison, Indiana

Madison, in Jefferson county, Indiana, is the second oldest city in the state and one of the most interesting. The first house, a log cabin, within what is now the city of Madison, was built in 1807. The town of Madison was incorporated in 1824 and the city of Madison in 1838.

Madison is situated on the Ohio River, bordering the state of Kentucky, in a beautiful and romantic valley, completely surrounded by hills 400 feet or more in height, with good automobile roads deviating in every direction. It is the birthplace of the first steam railroad west of the Alleghany mountains and north of the Ohio river; the Madison and Indianapolis R. R.—now a part of the Louisville division, Pennsylvania railroads system.

The one railway outlet from Madison ascends the hills by an incline 7012 feet in length (nearly $1\frac{1}{3}$ miles). The total elevation is 413 feet, or 311 feet per mile—a 6 per cent grade, or a rise of 1 foot in every 16½ feet. Most of this incline is cut through solid rock, making perpendicular walls on either side towering to the height of 100 feet, or more. The work on this plane was begun in 1836 and it was completed in 1841. At the time of construction it was the steepest railroad incline in the world. At the present time the cuts are said to be the deepest, for railway purposes, in this country.

Until about 1840 Madison was the thriving metropolis of the state, but with the advent of the railroads it began to lose prestige as a trading center as the railroads found it inaccessible on account of the hills.

For a number of years Madison stood still, making very little progress in any line but the last 25 years has seen Madison take on new life and it is now in better condition than it has ever been. Its manufacturing establishments run the year around and all houses in the city are filled.

It is believed that the completion of the lock and dam system of the U. S. Government, from Pittsburg to Cairo, which is now fast approaching, will be as great a boon to Madison as the advent of the railroad was to her competitors in the past.

Clifty Falls Park, a state park established by the State Conservation Commissioner, was opened to visitors in 1924 and during that year 150,000 people visited the park. This year 200,000 are expected. Clifty Falls comprises an area of 570 acres, about one and one-half miles from Madison. It is a gift from the people of the entire county to the state. The reservation includes scenic spots which are widely known. The feature is Clifty Falls, some 90 feet in height, and a series of smaller cascades. It is very rugged, thickly wooded, with many deep gorges, foot trails and excellent views. It has sometimes been called "The Switzerland of Indiana."

Madison is the largest tobacco market in Indiana, and aside from being the tourist Mecca of Indiana, it is one of the most thriving cities of the middle west in the 10,000 class.

Madison is distant about 95 miles from Indianapolis, 90 miles from Cincinnati, Ohio, and 50 miles from Louisville, Ky., via rail or automobile routes.

Street and Avenue Guide

West street is the dividing line for streets running east and west, while those running north and south are numbered from Front street north.

The even numbers are found on the east sides of the streets running north and south, the odd on the west. Of the streets running east and west the even numbers are found on the north sides west of

West street and on the south sides east of West street.

**To Find
a Name You
Must Know
How To
Spell It**

W. H. HOFFMAN'S

Madison, Indiana

CITY DIRECTORY

1925

Fractions after numbers indicate the floor— $\frac{1}{2}$ the second, 1-3 the third, etc.
The word street is always understood.

To find a name you must know how to spell it.

There being no rule for spelling proper names, we would suggest that you look for it under several headings.

A directory is simply to give a person's name and address. The occupation or business is to distinguish persons of the same name apart, anything else is advertising.

Name in Parentheses () is wife's name

The street directory is arranged alphabetically by numbers. It shows the number of each building and the name of the firm or the head of the family residing therein.

Names appearing in **CAPITALS** are patrons of this directory.

ABBREVIATIONS

adv—advertisement	enr—engineer	ret—retired
agt—agent	mnfr—manufacturer	rms—rooms
asst—assistant	furn—furnished	S or s—South
